

REPORT ABOUT DIRIANGEN SCHOOL

N°	Stuff they have in the school
1	7 computers DELL working well
2	3 Computers DELL damaged
3	A printer OKIDATA 6200 without ink
4	A photocopy which need to be checked and get full of ink
5	5 old computers which are lacking memory and hard disc.
6	2 CPU, 2keyboards, 2 mouse kept in the office,

This school needs the following stuff to improve their lab
And be better and complete.

N°	Description
1	They do not have a lot of computers but they have a lot of students, and something important they have space
2	12 batteries o stabilizers for each computers
3	3 fans o air conditioner
4	Speakers for each computers
5	They do not have internet.

This school has a little problem with the electricity and it has been rebuilt because it was a little destroyed. I mean the lab is being repaired and painted but the point they do not have enough resource to work in it, and as you know in these schools there are many students.

These are some pictures about the lab.

REPORT ABOUT MASACHAPA SCHOOL

In Masachapa there are 14 computers working, the weather has been too hot and the air conditioner of the lab is not working. This lab has internet but only five computers are connected. And the network is so slowly and sometimes the network does not work well.

They have been working with 250 students from primary school and secondary, these students did not know how computers work but they are learning. Other students who are not in the list of the 250 they receive a very formal course that can be useful if they want to get a job.

There is a group of students who are working in a project where they make a report about the environment of the town and it is sponsored by German people, also students use to come to research some topics about their home works.

I think this school has been working well in spite of the small space they have for the lab

Here are some pictures about the lab.

REPORT ABOUT LA CONCEPCION SCHOOL.

In La Concepcion there are fifteen computers working, and there about five monitors working well but they do not have computers, however they are available in case that a monitor does not work well we have those ones. We have classes from Monday to Saturday and from Monday to Friday we have class for people who are not students but they are at night from 6pm to 8pm. The mayor from La Concepcion has been providing help to open this course for those who are not students. We work with hundreds of students. I mean these computers have been working very hard during this year.

Now I send to you some pictures that I took last May.

REPORT ABOUT SAN RAFAEL SCHOOL

In this school there are about eight computers working well, they have been working with children from primary school, besides that they have been training the teachers from the school. I mean they have been working well too. I send to you some pictures they sent to me.
